

DO YOU HAVE OCD?

OCD Study

We're studying an investigational drug to potentially help treat OCD. Adults with OCD who are not satisfied with their current medication may be eligible to participate in a study with an investigational medication that would be added to their current medication.

If you have OCD symptoms, a clinical trial may be able to help. See if you qualify today!

What is a Clinical Trial?

Clinical trials take place in medical centers around the world, and involve volunteers helping doctors look at new ways to treat conditions.

Clinical trials represent the latest research about your condition, and can offer new treatment options.

Study Criteria

- You are between 18 and 65 years of age.
- You think you may have symptoms of OCD or you have been diagnosed with OCD.
- You are currently taking medications for OCD.

About Biohaven

Biohaven is a commercial-stage pharmaceutical company with a portfolio of innovative, best-in-class therapies to improve the lives of patients with debilitating conditions such as Obsessive-Compulsive Disorder.
