

Do you want to help design a new online platform to support parents/carers of children with OCD?

We're looking to design the content and layout of an
online platform to reduce burden and distress in
parents and carers of children with OCD

What does involvement look like:

- Take part in a 2-hour workshop with 6-8 parents/carers.
- Take part in group discussions about the design and content of the platform
- Undertaking tasks to see how user-friendly the platform is
- Looking at resources and designs and giving comments

Eligibility:

- Living in the UK
- You are a parent or carer with current or recent (within the last 12 months) experience of parenting a child with OCD age 8-18

The workshop will take place online or in person (according to preference) on Tuesday, 30th April 2024 10:00 -12:00 (there will be additional workshops and alternative dates available throughout the year)

Participants will be compensated for their time.
